Leasing

The next dimension of corporate mobility: flexible e-bike leasing.

Bike leasing by AMAG Leasing is so much more than a financing solution. It is a strategic instrument for your company that reduces mobility costs, strengthens your sustainability targets and positions you as a more attractive employer when competing for the best talent. From premium e-bikes for commuting to special vehicles for the fleet.

Budget-friendly, environmentally-friendly travel

Economic & efficient

- Preservation of liquidity: avoid high initial investment costs and retain full financial flexibility.
- Maximum budget security: transparent, reliably predictable leasing rates provide the security required for planning your fleet. Optimised total costs: reduce your corporate mobility costs while increasing value for your team.

Sustainable & future-proof

- Substantial CO₂ reductions: bikes make a concrete contribution to your sustainability targets, with about 0.5 tonnes less CO₂ emissions per employee in comparison with company cars.
- Focus on ESG & CSR: bike leasing can make a concrete contribution to your corporate sustainability targets and ESG reporting.
- Modern corporate culture: encourage active, environmentally-conscious, forward-looking mobility.

Benefits to you at a glance

- **All-inclusive option:** in addition to the bike itself, all insurance and – depending on your needs – servicing and wearing parts are included in the leasing rate.
- **Financially attractive:** take advantage of cost benefits and enjoy better leasing rates when building a larger bike fleet.
- **Extensive support:** we take care of all administrative and operational implementation for you.
- **Employee retention & sustainability:** promote your team's health, increase your attractiveness as an employer and make a strong statement about environmentally-friendly mobility.

Economic considerations: purchase vs leasing

Criterion (Conventional purchase / AMAG bike leasing)	Conventional purchase	AMAG bike leasing (all-inclusive)
Capital commitment	CHF 100,000 fixed capital (example: 20 e-bikes)	CHF 0 capital commitment
Monthly charge	High one-off investment reduces liquidity	approx. CHF 4,000/month (predictable rates)
Services & protection	Not included (additional costs for servicing, wear & insurance)	All-in-one package included on request
Administrative effort	High manual effort for repairs & documentation	Efficient, modular implementation via AMAG Leasing

Tailored for companies of any size

Whether as a benefit for your workforce or an additional concept for your vehicle fleet, bike leasing can be customised to your individual company's requirements and offers numerous possibilities:

- **Staff leasing:** an attractive staff benefit for commuting and personal use.
- **Business & service vehicles:** rapid, flexible mobility for service technicians and field staff, particularly in cities.
- **Cargo & freight bikes:** the environmentally-friendly, efficient alternative for last-mile and short-distance goods delivery.
- **Campus & property development mobility:** shorten the distances on sprawling company or factory premises – or even between neighbouring locations.
- **Individual concepts:** we enhance your current fleet with concepts tailored to your fleet policy – for an improved total solution.

Get started together now

Ready to get your team moving? It's easy to get in touch with us. Simply send us your query by e-mail to new.mobility@amag.ch.

Our B2B Senior Sales Specialist, Piero Imbrogno, will then contact you personally to find out your individual needs and develop an offer that is perfectly tailored to your company.
